Feed A Child Botswana

"A child is a gift from God and
our love to that child is a gift
to God."

Effective Action

The project began in August 2012 to address the basic nutritional needs of the community in the populations of focus in the government's Poverty Eradication programs. Specifically, these are **orphans and vulnerable children, and elderly with ailing health**.

We take an integrated, sustainable, and people driven approach to empower individuals through proper nutrition.

Empower

The **Economic Empowerment Project** was started in 2017 to teach parents skills to make various products. The goal is to create an income source so they may feed their children once they are no longer eligible for Nutrimeal.

Products include:

- Reed straws
- Crocheted stuffed animals, scarves, baby blankets
- Beaded bracelets to raise awareness of malnutrition

Buy at Feed A Child or Travel for Impact offices.

Nourish

Feed A Child Botswana's goal is to provide a nourishing meal to children and elderly whose circumstances have placed them on or below the poverty line.

Sufficient nourishment promotes healthy bodies and empowers healthy minds for optimal development. With adequate nutrients, foundations for optimal health, growth, and neurodevelopment are set. As a result, children are better prepared to be successful in their future education. Elderly are cared for and have a renewed sense of dignity.

Nutrimeal

Nutrimeal is a **fully fortified porridge** that provides sufficient daily vitamins and minerals. It is cost effective, does not require cooking, and easily prepared by mixing with water,

- Distributed 5 days a week at kgotlas in Maun to children under 6 years
- Mix given to make weekend servings at home
- Elderly over 65 years receive a weekly supply of mix

Nutrimeal is also available for purchase!

A portion of proceeds allows us to provide more meals to those in need.
